## SPINDRIFT TILES FROM ISLAND STONE® DELIVER THE DESIGN OF PEBBLE TILES IN A GLASS MOSAIC

Dancing in the light and smooth underfoot, the collection elegantly interprets natural forms

(Watsonville, CA, November 30, 2017) New from **Island Stone®**, **Spindrift** captures the feeling of walking barefoot across natural terrain—without the rugged experience. Spindrift interlocking tiles combine the comfort and class of a flat, matte mosaic with the eye-catching shapes and organic

style of stone pebbles. The result is a sleek and striking interpretation of nature's raw appeal.

“Homeowners love the natural appeal of pebble tiles, and Spindrift offers that desirable look while also bringing in a cheerful brightness unique to

glass,” says Sander Nauenberg, director of sales & marketing for Island Stone. “The first of its kind, Spindrift brings the beauty of the great outdoors into the home.”

Installed, the mosaic of pebbles forms a seamless sea of smooth, brightly colored stones. Spindrift tiles measure 11¾” square and come in six colors: Pure Silk, Tule, Smoke, Stratos, Spring, and Azure. An opaque white backing provides optimum reflection, causing light to dance across the stones, for an eye-catching effect.

The distinctive tile series can be used for floors and walls. As practical as they are beautiful, the Spindrift tiles are durable and acceptable for use in exteriors, residential floors, and pools.

## ABOUT ISLAND STONE

**Island Stone** took root in Indonesia, where company founders were inspired by the nation’s handicraft industry and natural stones to create the flagship **Perfect Pebble Tile**. The company’s original mosaics diversified into various other natural mosaics utilizing exotic stones. Today the company’s design continues to evolve, sourcing from distinct locales around the globe and featuring a range of natural stone mosaics, glass tiles and mosaics, as well as quarried stone tiles, mosaics, and wall claddings. Through its **Island Timber** division, the company crafts wall cladding from salvaged woods from historic buildings in Indonesia.
